Storage Tips

Â

Â

Spray wood furniture with a good polish.Â Protect furniture with throw covers or paper.Â Remove legs and disassemble, if possible, to conserve space.Â Wrap mattresses and box springs with plastic covers, drop cloths, or paper.Â Thoroughly clean and dry refrigerators or freezers to avoid moisture and/or mildew damage. Leave doors slightly ajar when stored.Â Drain all oil and gas from small engines.Â Prevent rusting of exposed metals and tools with a light coat of oil.Â Keep all items off the floor if possible to allow for the circulation of air.Â Use boxes or plastic bags for storing clothes.Â Seal boxes with quality tape.Â Keep items that you will need access to more frequently at the front of your unit.Â Stack pictures and mirrors on their sides.Â Cover the entire contents with a light plastic cover.Â Insure your goods while in storage. Ask the manager about self-storage insurance at reasonable rates.
