

Climate Controlled Units

WE HAVE EXPANDED!!!

In the fall of 2010 we added a 4,000 sf building and in the fall of 2011 we completed another 6,000 sf building. Both new buildings include climate controlled units for storage of electronics, antiques, leather products, and other items that are sensitive to extreme temperatures. The climate controlled units are accessed only with a keypad code, adding another level of security.
